

PENNINGS HARD CIDER

BROWN SNOUT

VARIETAL COLLECTION

The Varietal Collection is cider research from the roots up.

The Varietal Collection is made to focus on the characteristics of one particular apple variety.

- The apples are grown on-site in Pennings Cidery Orchard or from other New York state orchards.
- Each varietal is named after the apple(s) it is intended to highlight.
- No added sugar, flavoring or color
- The ultimate goal is to use what we learn about each cider variety to develop and perfect signature blends
- All label art was painted by a local artist, Janet Howard-Fatta

BROWN SNOUT

A cider apple variety originating in Hereford, England, produces a mild-medium bittersweet cider with soft tannin.
